NEW! BEKAL™ RICE BRAN OIL

FEATURES

GAMA Products, Inc. introduces **BEKAL Brand Rice Bran Oil** to its product line of vegetable oils. Rice bran oil has long been prized in Asian countries such as Japan for its remarkable qualities above other oils, which include:

- A more stable frying oil than other oils in its natural state, not requiring hydrogenation, with a longer frying life (approx. 20% to 30% longer than partially hydrogenated soybean oil).
- Rice bran oil provides a naturally balanced saturated to unsaturated fat ratio.
- o Very high smoke point (450° F) for cooking and frying at high temperatures.
- Light nutty taste that brings out the flavour of fried foods without a greasy taste.
- All natural, made from non-GMO (non genetically modified) rice bran, with no additives, chemicals or preservatives.
- Nutritious and Healthy.
- Not hydrogenated.
- Limited saturated fat content.
- No trans fatty acids
- Naturally occurring antioxidant components, including tocopherols and tocotrienols (forms of Vitamin E) and gamma-oryzanol

Many vegetable oils commonly used today in the food service industry, including shortenings and margarines, have been partially hydrogenated. In addition to increasing the saturated fat content, hydrogenation typically results in the formation of trans-fatty acids (TFA's). Like saturated fats, TFA's in the diet are believed to increase serum levels of bad cholesterol (LDL) and contribute to cardiovascular disease. BEKAL Brand Rice Bran Oil is a healthy choice because it is naturally limited in saturated fats and contains no TFA's. The US Food and Drug Administration will soon require companies to declare the trans-fatty acid content of products to make consumers more aware of this issue. BEKAL Brand Rice Bran Oil economically solves these problems and, at the same time, insures superior flavor and quality i fried foods.

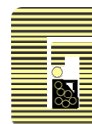

ADDITIVES

None, although antioxidants can be added as requested.

SHELF LIFE

Our retail pack is coded with a shelf life of 2 years. Food service pack is not coded unless specified by customer.

TECHNICAL SPECIFICATIONS

| TYPICAL ANALYSIS | |
|-------------------------------|--------|
| Appearance @ Room Temperature | |
| Lovibond Color Red, max. | 3.5 |
| Free Fatty Acid % max. | 0.05 |
| Flavor/Odor (bland/none) min. | 7 |
| Peroxide Value Meq. max. | 1.0 |
| Iodine Value | 99-108 |
| Smoke Point min. (Fahrenheit) | 450 |
| Flash Point min. (Fahrenheit) | 620 |
| Fire Point min. (Fahrenheit) | 670 |
| Moisture (%) max. | 0.05 |
| Chlorophyll (ppb) | 75 |
| AOM min. | 25 |

PACKAGING SIZES

| PK | SIZE | | PK.TYPE | CUBE (FT) | GROSS WT (LB) | CASES PER PALLET |
|----|---------|--------|---------------|-----------|---------------|------------------|
| | US | METRIC | | | | |
| 1 | 55 GAL | 208 L | Plastic Drum | 12.00 | 450.0 | 4 |
| 2 | 17.5 LB | 8.7 L | HDPE (Yellow) | 1.00 | 37.5 | 60 |
| 6 | 128 OZ. | 3.8 L | HDPE (Yellow) | 1.50 | 48.5 | 45 |
| 6 | 96 OZ. | 2.8 L | HDPE (Yellow) | 1.20 | 37.5 | 50 or 60 |
| 8 | 64 OZ. | 1.9 L | HDPE (Yellow) | 1.15 | 33.0 | 60 |
| 8 | | 1.6 L | HDPE (Yellow) | 1.15 | 29.0 | 60 |
| 12 | 32 OZ. | .95 L | PET(Clear) | 0.85 | 26.0 | 84 |
